Design notes

Curly “quotes”, an em dash — and accents: café, naïve, Zürich. Ligatures: office, efficient, flow.

A second paragraph that runs long enough to wrap onto a second line of the page, so wrapping is tested as well as breaks.

```
def add(a, b):
    return a + b
```

Name	Count
apples	3
pears	12

The left column text goes here and keeps going for a while so that it fills a few lines in the left column.

The right column follows on, and the reader should keep each column whole.

A figure

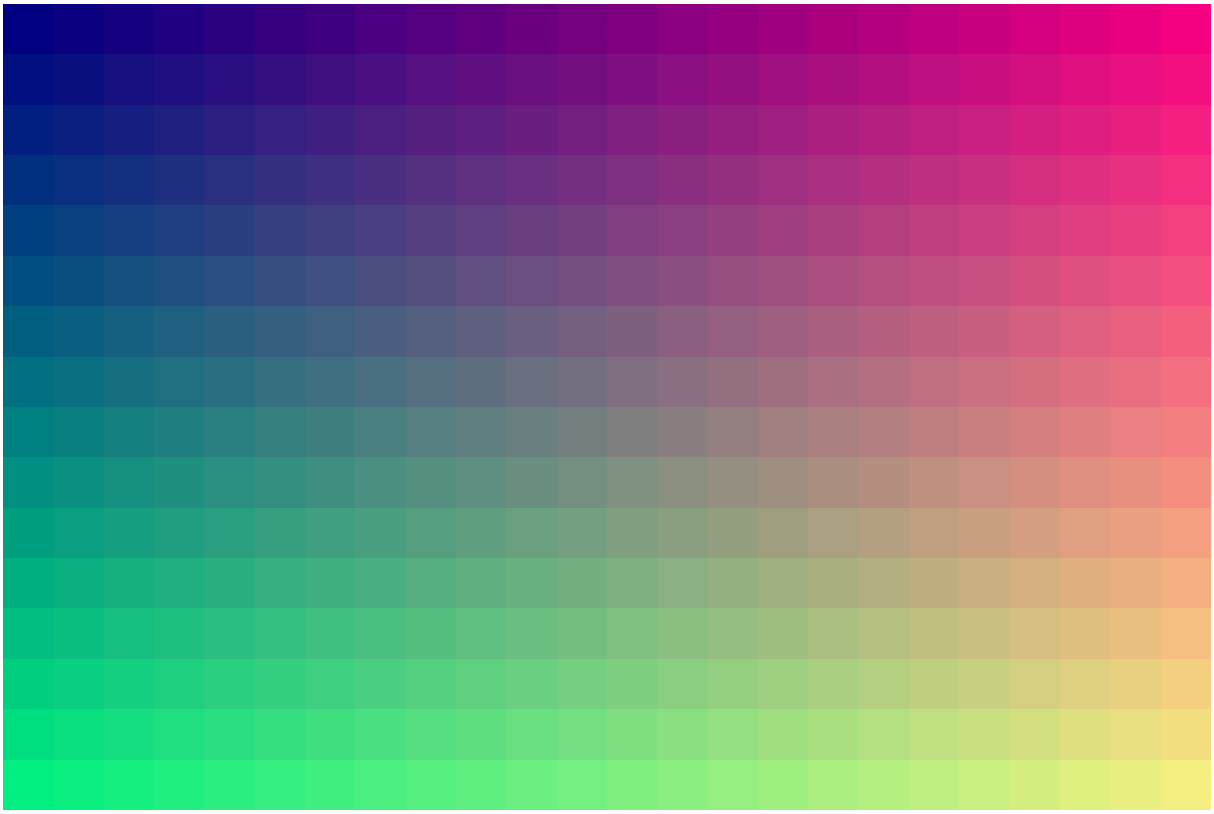

Figure 1: a gradient.
